TECNOMOTOR®

SOCIO 6x0

Diagnostic Tablet with Integrated Scope

Key Features

- Vehicle selection and identification of diagnostic socket and required cable
- ECU diagnosis with parameters, status, errors codes reading/deletion, enabling, coding, technical data sheet, service reports, saving of test session
- Evoluted Scan error functions
- Advanced ECU selection (Through engine code, brand model, ECU etc)
- Scope and Diagnostic in the same screen to compare electrical and digital signals of the ECU
- ECU automatic search
- Road test with diagrams
- Pokayoke features and data (Airbag, Service and maintenance, vehicle DTC scan and Technical Data)
- Oscilloscope with 4 channels and integrated signal analysis
- Digital multimeter
- Display/acquisition of images from external endoscope
- LPG/CNG leak detection
- Bluetooth connection to PC for remote data upload and PASS-THROUGH operation
- SOCIO PREMIUM PC software enables module management from PC.
- **Easy fix Diagnostic systems integrates Troubleshooting information starting from a failure of a single component with automatic scope and diagnostic setup. It allows the simultaneous check of diagnostic data and scope parameters.**

Standard Configuration

- Tool with textile safe keeping
- Case
- EOBD cable for vehicle connection plus 3 m extension cable
- 16GB SD card or higher
- SD card reader
- 5 leads+ clips for the acquisition of electric signals and 2 test probes
- Installation Manual
- CD-ROM with manual and update software
- 12-months of free update subscription
- Main power supply
- Bluetooth module for PC

Part No. 6011000045 Vehicle Hook

Cutting-edge Technology. Easy and Accurate.

Technical Specifications

Protection class: IP54 or higher
Rubber overmoulded shockproof case
Power supply: 8 to 48 V
Intel/Marvell II PXA 270: 520 MHz Internal Clock - 204 MHz Bus or higher
800x600 TFT Display: size 8", 262144 colours, high brightness and visibility (vertical and horizontal display regulation) Touch Screen
RAM 64MB & STRATAFLASH 32MB
Removable SD CARD: 16 GB or higher
2 Internal Lithium Battery Packs rechargeable from diagnostic socket.
Over 4 hours of operation disconnected from diagnostic socket
Integrated Bluetooth device for wireless communication with external devices or PC, class 1 - 300 m
Report printout: via USB mass storage key or via BT through PC
Available expansions: 3 USB ports, endoscope, CNG/LPG leak detector.
ECU communication:
Microcontroller for real time communication with control units:
Fujitsu MB96F543, Altera EPM77128SQ coprocessor
RAM 128 KB for real time hardware communication with vehicle control units
Electronic Multiplexer integrated. Fully automatic
Supported protocols: Pulse code, KL-ISO9141, KISO14230, J1850VPW, J18050PWM, CAN low/high speed, RS485, ISO 15765, SAE J2610, ISO11992, SAE J2740, SAE J2411, SAE J1939, ISO 11992, RS232, J2534-3 passthrough compliant.
Operating temperature: -20 - 70 °C
SCOPE/MULTIMETER (picture of sensors)
ARM STELLARIS NXP LPC 2378 Oscilloscope Microcontroller
4-channel ADC scope. 25 MS/s sampling rate for each channel
± 200V - 8-bit vertical resolution- 64 KB internal Ram
Internal accelerator to switch automatically the display from horizontal to vertical
Multimeter: 16-bit vertical res. ± 200V
Galvanic isolation for multimeter/oscilloscope
